

Sahil Gaund

+91-XXX-XXX-XXXX | sahilgaund42@gmail.com | linkedin.com/in/sahilgaund03 | Thane, Maharashtra, India

PROFESSIONAL SUMMARY

AI & ML Engineering Student and aspiring Software Engineer with specialized expertise in Generative AI, supervised learning, and regression analysis. Proficient in Python with hands-on experience in machine learning implementation and software engineering practices. Completed industry certifications from NVIDIA, Google Cloud, Databricks, and Commonwealth Bank. Demonstrated ability to build ML models, analyze patterns, and contribute to real-world AI applications. Passionate about responsible AI design and innovative cloud-based solutions.

EDUCATION

Dr. Homi Bhabha State University (DHBSU), Mumbai <i>Bachelor of Science in Information Technology</i> • Focus: AI, Machine Learning, Software Engineering, Data Structures, Python Programming, Database Systems	Mumbai, India Jan 2025 – Sep 2028
Sant Gadge Maharaj College, Bharat Education Society <i>Bachelor of Commerce in Information Technology</i> • Built foundation in IT fundamentals, business applications, and analytical thinking	Mumbai, India Aug 2024 – Apr 2025

TECHNICAL SKILLS

Machine Learning: Supervised Learning, Logistic Regression, Regression Analysis, Generative AI, Large Language Models, Image Captioning, Model Training, Pattern Recognition
Programming & Development: Python (ML/AI Implementation), SQL, HTML5, Software Engineering Practices
AI/ML Tools & Platforms: Google Cloud AI, Databricks ML Platform, NVIDIA AI Toolkit, TensorFlow, PyTorch
Cloud & Innovation: Google Cloud Platform, Cloud-based AI Solutions, AI Integration
Core Competencies: Algorithm Design, Data Analysis, Model Evaluation, Problem-Solving, Technical Documentation

PROFESSIONAL CERTIFICATIONS & TRAINING

Introduction to Generative AI <i>Google Cloud Skills Boost</i>	2025
Innovation with Google Cloud AI <i>Google Cloud</i>	2025
Get Started with Databricks for Machine Learning <i>Databricks Academy</i>	2025
Create Image Captioning Models <i>Google Cloud Skills Boost</i>	2025
Commonwealth Bank - Introduction to Software Engineering <i>Job Simulation</i>	2025

PROJECTS & TECHNICAL EXPERIENCE

Supervised Learning & Regression Analysis Projects • Implemented supervised learning algorithms including logistic regression and regression analysis using Python • Built predictive models for classification and regression tasks with focus on model accuracy and optimization • Analyzed datasets to identify patterns, feature importance, and key insights for decision-making • Applied cross-validation techniques and hyperparameter tuning to improve model performance	2025 - Present
Software Engineering Job Simulation - Commonwealth Bank • Completed industry-led software engineering simulation covering real-world development practices • Gained hands-on experience with software development lifecycle, code quality, and engineering best practices • Practiced collaborative development workflows, version control, and technical problem-solving	2025
Generative AI & Cloud Innovation Projects • Explored Generative AI fundamentals including how models learn patterns and generate content • Studied innovation with Google Cloud AI, learning to build and deploy cloud-based AI solutions • Implemented image captioning models integrating computer vision with natural language processing • Worked with Databricks platform for end-to-end ML workflows including data preprocessing and model training	2025
Machine Learning Algorithm Implementation • Building practical Python skills for implementing ML algorithms from scratch and using libraries • Focused on supervised learning techniques: classification, regression, feature engineering • Documented model performance, limitations, and optimization strategies for production readiness	2025 - Present

KEY ACHIEVEMENTS

• Completed 5 industry-recognized certifications from Google Cloud, Databricks, and Commonwealth Bank in 2025
• Recognized on LinkedIn for expertise in Supervised Learning, Logistic Regression, and Regression Analysis
• Successfully completed Commonwealth Bank's Software Engineering Job Simulation, gaining industry insights
• Built strong foundation in both AI/ML and software engineering through dual educational pathways
• Demonstrated self-directed learning through structured certifications and hands-on project implementation

CAREER OBJECTIVES

Seeking AI/ML internship or software engineering position to apply expertise in Python, supervised learning, and regression analysis. Particularly interested in roles involving machine learning development, cloud-based AI solutions, or software engineering in innovative tech environments. Eager to contribute to impactful projects while gaining hands-on industry experience with cutting-edge technologies.
